Step 1: Locate the **<u>CODE SET</u>** button on the wall control box (for MPC3, see below left picture) or control panel at the back of overhead drive unit (for MPC4, right picture) ➔ Press this CODE SET button for one second;

Step 2: Press any one of the top two buttons of the new remote for one second ➔ Programming completed! Press the same button to test. If no success, please repeat step 1&2.

MPC3
Wall Control Box

MPC4 Drive Unit

Note: **If you have an old remote which is still working, you will need to re-set the dip switches inside it to make it work along with the new remote.**

Step 1: Set the side switch, which is located on the left side of the old remote (see arrow in picture below) to **<u>UP</u>** position.

Step 2: Remove the battery cover, set the positions of the 8 dip switches inside as below ➔ Now your old remote should work
